

MOLECULAR GENETICS REPORT - Details

 About This Test

Comments from the Doctor's Office

Your molecular studies remain negative! Please let me know if you have any questions.

Thanks,
Katie

Transcriptions

Case Number: 1-MG-17-0003758

Test Performed

BCR-ABL Quantitative Mbcr IS-MMR

Specimen

Peripheral Blood was received for molecular analysis, clinical indication for molecular assay CML monitoring, by the DMB laboratory on 12/6/2017.

Final Diagnosis

Negative for BCR-ABL1 fusion transcript p210

LAWRENCE J JENNINGS, MD, PHD
(Electronically signed by)
Date Finalized: 12/15/2017 03:45 pm

I, the Attending Pathologist, attest by my signature that I have personally reviewed and examined this case, grossly and/or microscopically, and have made or confirmed the diagnosis(es).

Comment

Major Molecular Response (MMR): Yes

Patient's prior BCR-ABL Quantitative results:

Molecular Case Number	Collection Date	Specimen	Result BCR-ABL/1000ABL	Result BCR-ABL/ABL (IS%)
MG17-1686	6/7/2017	PB	NEG	NEG
MG16-1643	6/1/2016	PB	NEG	NEG
