This is an exercise in simple logical reasoning. Please read the instructions carefully.
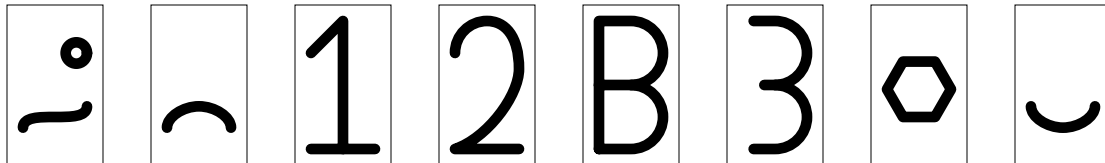

Below are pictures of eight cards. Each card has a symbol on both sides. Only one side is shown. There are ten symbols that can appear on the front of a card:

five *letters*   A B C D E

five *numbers*   1 2 3 4 5

and ten that can appear on the back of a card:

five *shapes*   ○ △ □ ⬠ ⬡

five *faces*   ‿ ⌒ ☺ ⌣ ☻

Someone has told you that every card with a *letter* on the front, has a *shape* on the back. Please circle each card that you would need to turn over in order to check whether they are correct.

⌐○	⌒	1	2	B	3	⬡	‿

(*optional*) Explain below why you circled those cards.
