

## PDF form fields and JavaScripts by FOP

Document is opened with a beep and 200% zoomed.

This button lets you open a browser window. Try a wav-file and listen!

This button displays the value of the text field below and changes the text color to red.

Here is the same text field as above.

And this is a listbox. Note: you see the hint by positioning the mouse to the very left of the text.

This checkbox beeps when you move the mouse pointer over.

Submit data to an e-mail address

Tips:

Load this document into a web browser!

Hints display the file names used to generate form fields.

File URL's: 'file:///C:/temp/dummy.txt' or '/c/temp/dummy.txt'. Entering '?' instead of a filename produces a file selection dialog.
