

# Google Team Meets Students and Developers in Vietnam

Date: 21 March – 26 March, 2016

Location: Hanoi and Ho Chi Minh city

## Cat Allman

Cat is the Science Outreach and Open Source Program Manager at Google. She manages outreach to the global FOSS community with her team. She runs student programs such as Google Summer of Code and Google Code-in, sponsors and hosts FOSS project events, and funds a wide variety of projects. She speaks at conferences, and in her spare time is a co-organizer and the logistics lead for Science Foo Camp, an annual invitation-only un-conference for scientists.

## Google Talk at GDG

Cat Allman and Stephanie will deliver a one hour presentation about Education Program at Google covering Google Summer of Code, Google Code-In and Science Outreach program. At the end of the presentation there will be a 30 mins Q&As which encourages students to have direct interaction with the team.

Google Summer of Code (GSoC) is an international annual program, first held in 2005, in which Google awards stipends of US\$5,500 to students who successfully complete a requested free and open-source software coding project during the summer. The program is open to students aged 18 or over.

Google Code-In (GCI) is an annual programming competition that allows pre-university students to complete tasks specified by various, partnering open source organizations. Students that complete tasks win certificates and T-shirts. Each organization also selects two grand prize award winners who will earn a trip to Google's Headquarters located in Mountain View, California
