JOB DESCRIPTION

Company Name : **QPLAY Tech Pvt.Ltd**
Job Title : **Senior Android Developer**
Experience : **1+ years**
Location : **Ernakulam, Kerala**

We are looking for a senior mobile app developer to lead the design, development and maintenance of Android. The developer will lead the entire app lifecycle right from concept stage until delivery and post launch support. Apps will be mainly content based and integrated closely with the web sites.

Main tasks and responsibilities:

- Acting as lead Android developer. Depending on the skills set can be lead on one platform and play a supporting role across the other
- Deliver across the entire app life cycle –concept, design, build, deploy, test, release to app stores and support
- Working directly with developers and product managers to conceptualise, build, test and realise products Gather requirements around functionality and translate those requirements into elegant functional solutions Build prototypes at tech scoping stage of projects
- Working along the web developers to create and maintain a robust framework to support the apps
- Working with the front end developers to build the interface with focus on usability features
- Create compelling device specific user interfaces and experiences
- Standardising the platform and in some cases apps to deliver across multiple brands with minimal duplication of effort Optimising performance for the apps
- Keep up to date on the latest industry trends in the mobile technologies
- Explain technologies and solutions to technical and non-technical stakeholders
- Attend industry events/ conference – both attending and presenting

Person specification:

- Proven commercial software development experience – desktop and mobile
- Excellent knowledge in information architecture, human computer interaction and usability design principles
- A track record of delivering successful consumer and or business products
- Ability to use analytic data and user testing to inform design decision
- A passion for new consumer technology and the emerging media landscape
- Ability to multi task and good time management skills

- Ability to work on their own and as a part of the team
- Excellent scoping and estimation skills
- Excellent testing/ QA skills
- Excellent communication skills (verbal and written) to liaise with various departments locally and internationally

Essential skills:

Android –
- Extensive knowledge of Android Jellybean and newer + Android Studio
- Strong experience with fragments and techniques for building apps that support different layouts for smartphones and tablets
- Great understanding of memory management and optimisation techniques
- Experience in writing custom UI components and libraries
- Experience in writing home screen widgets
- Experience with Git
- Experience with ADB and Gradle
- Experience with all the usual stuff (multi-threading, integration with REST APIs, view animations, custom transitions, multi-threading again…)

Desirable Skills:

- Understanding of HTML / Javascript
- Understanding of at least one server-side technology (e.g. PHP, ASP.NET,Python, Node.js) and REST API development
- Experience with development for smart watches

Competencies for success:

- Creativity
- Learning on the Fly Technical Learning Action Orientated Dealing with Ambiguity Presentation Skills
- Peer Relationships
- Time Management, Written Communications, Problem Solving
