

Company Description

Eurospider S.R.L has been founded in spring 2005 to represent Eurospider Information Technology AG Switzerland, a spin-off of the Swiss Federal Institute of Technology (ETH) Zurich. Founded in 1995, Eurospider Switzerland is a leading expert for relevancy retrieval software with a focus on knowledge portals, legal content, compliance management and digital libraries. Eurospider develops powerful systems for companies and organizations with information-intensive and knowledge-based business processes. Relevancy retrieval stands for the indexing and preparation of relevant information from both structured and unstructured data. To reinforce our R&D Technology center located in Bucharest, we are recruiting a highly motivated

JUNIOR SOFTWARE DEVELOPER

Education / Experience:

- Polytechnic University of Bucharest, Computer Science Faculty or other Computer Science University with Excellent university degree/marks in Computer Science.
- 1-2 years working experience.

Technical Skills:

- Good knowledge of programming languages: Java, C/C++.
- Good understanding of OOP concepts.
- Good knowledge of programming algorithms and data structures.
- Some experience with RDBMS (SQL, Oracle, Postgres).

Considered as Asset:

- Some experience with advanced component development (Servlets, Web Services).
- Some experience with PHP, .NET or ASP.
- Some experience with Java J2EE development and technologies (Spring Framework, Applets, JNI, JSP, XML, XSLT).
- Experience with Linux/UNIX.

Your Profile:

- Team oriented, flexible, highly motivated.
- Outstanding Romanian and English communication skills.
- Geographical flexibility (work place is Bucharest, willingness to travel over 30% of the time).

Position

You will be in charge of:

- Software development: you are able to develop software modules based on specifications. You participate to the design and development of new software releases to deliver high quality products and to answer to customer expectations.
- Software maintenance: you are involved in the problems analysis and solving related to software usage. You provide technical answers and deliver new software releases. You are a key player in the improvement of software quality.
- Software testing: you join test campaigns for new software releases.

Joining our organization, you participate to Relevancy Software evolution. You work in close cooperation on common projects with R&D Engineers located in our centers in Zurich and Bucharest.

Compensation

- An attractive base salary and the possibility of a variable bonus based on individual's contributions.
- A highly professional working environment in a multinational company with excellent career development opportunities.
- An attractive office location situated in the center of Bucharest.

If the above profile suits your qualification, please send your CV in English and a motivation letter by March 25th, to email elena.mocan@fine-consulting.com, fax: 021 3038292. All CVs will be treated with maximum confidentiality. Only the selected candidates will be contacted. Thank you.
