

I selected lyx-code to display the computer code listing shown below. The lines starting with `Visitors`, `#list`, `format`, and `#br` should all display in bold face in the *.pdf document. The lines starting with `#h2` should be struck out. All other lines should be normal face.

```
body() ->
  Visitors = visitors_db:get_visitors(date()),
  [
    #h1{ text="WELCOME!" },
    #h2 { text="Joe Armstrong" },
    #h2 { text="Rusty Klopau"
    #list{numbered=false, body=
      format_visitors(Visitors)},
    #br{}
  ].
```
