

1 The « ; » signs shouldn't be at the beginning of a line, there must be space before all sign (look at the rules here : <http://wiki.contextgarden.net/frenchpunctuation>) :

Toto titi toto titi toto titi toto titi toto titi toto titi toto titi toto titi toto titiii Test ;  
test : test ? test ! « test » **with nbsp before punctuation**

Toto titi toto titi toto titi toto titi toto titi toto titi toto titi toto titi toto titiii Test ;  
test : test ? test ! « test » **with ~before punctuation**

2 When there's punctuations sign folow, there's no space beetween them : ... !!!!!?  
except for the « : ».

3 « In this « test » first level quotes must be guillemot (“« ”) and « second level quotes » must be the same as english first level — with no spaces. »

4 Before the number (or the sign) of a footnote, there's a realy small (sometime nothing) space before him<sup>1</sup>. This thin space is an nbsp space<sup>•</sup>. It's the same for the arrow of the goto sign.

5 The sign for hyphenate is « - ». The same signe is used for composed-word : Test with the context–synthax.

---

<sup>1</sup> one's not suppose to see a space before the number
