Roadmap

- Fix known bugs
 - Box layout not refreshing correctly lists
 - Number input does not handles correctly the min/max
 - Scan the issue tracker
- Finish not-implemented backends
 - Toolbar items (toggle, label, radio)
 - Rich text
- Implement missing features
 - Filter list/table/tree
 - Code
 - better autocompletion integration,
 - context menu missing parts
 - make it inherit from Rich text (for the colorisation) ?
 - Style
 - Expand to all components
- Fix demo
 - It should work also for Gtk
- Write documentation
 - A tutorial
 - A demo application
 - Comprehensive documentation on architectural concepts

Next

1. Release
2. Collect experience to add new features for v2.0
